

Meet Author & Participate in Lucid Co-Creating Workshop

In relation to the novel “THE ORACLE – Here or there” this workshop is about tapping into messages from our dreams and dreams like states of being.

I will share with you about my backgrounds and what prompted me to write that story. I would welcome all your questions and will be happy to respond to them. (Why fiction? How to write, publish own book and anything that is in your interest.)

For whom?

Those seeking change, improvement in different aspects of life such as life path, career, personal growth & relationships.

Can dreams assist us in everyday life?

How can they be helpful?

How can their meaning be accessed?

It is not only when we sleep, we dream. In every moment of the day subtle feelings, images occur in our body and mind. Following them and exploring their meaning is what can heal us, lead us and solve our challenges.

More about workshops

Types of dreams:

* conscious, lucid, when we know we dream

* unconscious

* dreaming while awake – here is where our focus will be.

The evolution and growth of a human being are greatly represented by a tree.

The stronger root, the more you know your shadow, the more you can grow high in the sky and spread your branches.

Why dreaming would be important: we can change the dream, so our reality and portion of destiny, shape our future, heal the past, etc.

Breath – Feel – Move – Create

Embracing the artist within

There will be time for questions, answers & feedback.
